

Hi, I'm Jaclyn

Corporate Finance, New York

MY ROLE AT GUY CARPENTER

As the Corporate Finance Leader for Guy Carpenter, I manage a team that delivers the financial analysis and proactive insights required for senior management to drive the strategic direction for our firm. Our team is responsible for global finance consolidation and MMC reporting while managing global strategic plans, operating reviews, budgets and forecasts, as well as projects related to business unit performance and strategic opportunities. I also serve as the Finance Lead for Blue Marble Microinsurance, a consortium involving MMC and seven insurance companies collaborating to extend insurance protection to the emerging middle class worldwide.

WHY I CHOSE A CAREER IN (RE)INSURANCE

I was fortunate to gain early exposure to our industry, which shaped my impression of the opportunities available and inspired my desire to pursue a career in insurance. At an early age, I witnessed firsthand the integrity, work ethic, passion and loyalty MMC colleagues have both for our organization and the broader insurance industry, and knew I wanted to pursue a similar experience.

WHAT HAS SURPRISED ME THE MOST

I've been impressed by the willingness of all leadership levels within Guy Carpenter to engage and actively develop emerging teammates across the organization. People may have preconceived impressions of the insurance industry but my experiences have confirmed exciting opportunities exist to drive impactful change and implement fresh, innovative ideas to serve clients and accelerate our overall business momentum.

MY BACKGROUND

I started my insurance career in Toronto after earning my undergraduate degree in Finance, Chartered Accountant designation, and completing my MBA. Since joining MMC, I've been fortunate to enjoy a varied North American career developing a broad range of skills relevant for future leadership roles. My aspiration is to maximize my potential and earn additional responsibilities, eventually leading priority businesses within the firm.
