New York, October 22, 2013 – At the PCI 2013 Annual Meeting, James Waller, PhD, GC Analytics® Research Meteorologist for Guy Carpenter & Company, LLC, the leading global risk and reinsurance specialist and member of Marsh & McLennan Companies (NYSE: MMC), was a featured speaker to discuss meteorological challenges, including the unique aspects and impacts of Superstorm Sandy.

During an in-depth session held on October 22, Dr. Waller reflected on the significance of historical meteorological events, as well as research and industry developments pertaining to climate change and possible mitigation strategies.

"The past three years represent a significant time period of severe convective losses impacting the insurance industry," said Dr. Waller. "Within this short timeframe, we witnessed the sheer power and destructive potential of tornados, first with the events of Tuscaloosa and Joplin in 2011 and then the Moore, Oklahoma tornado of 2013. The majority of tornadoes are actually EF-2 or weaker on the Enhanced Fujita scale. This is a range where resilience measures in building codes and standards can make a difference to help protect our communities."

Finally, as we approach the one-year anniversary of Superstorm Sandy, Dr. Waller provided a timely in-depth review of the unique aspects of the storm, including the storm structure, damage characteristics and impacts to the (re)insurance industry.

"Last year at PCI, we watched as Sandy made the infamous 'left-hook' track into the East Coast, later classified as a 700-year return period track," said Dr. Waller. "We witnessed a unique and historic storm that caused unprecedented damage to the Northeastern United States. FEMA recommendations for elevated homes were demonstrated to improve home resilience under Sandy’s historic storm surge. Fortunately, we are currently experiencing a quiet tropical season in the North Atlantic, but even now, one year later, the recovery and rebuilding process left in Sandy’s wake continues."

The PCI Annual Meeting, held in Boston, MA from October 20-23, is focused on essential strategies to win in the face of evolving markets and emerging threats. The event is designed exclusively for CEOs and senior executives of property casualty insurance companies, reinsurers, brokers, intermediaries and underwriters.
