

Hi, I'm Jagadish

GC Technology Group, Hoboken

MY ROLE AT GUY CARPENTER

I am a Senior Solutions Architect in Technology at Guy Carpenter. I work with business and technical teams to design simple and innovative solutions – either solving a problem or developing an opportunity. I work with passionate associates who share the common goal of improving business outcomes using various technological capabilities. Collaboration and open communication are key to my role.

WHY I CHOSE A CAREER IN (RE)INSURANCE

The reinsurance industry is global in nature and it's great to work on interesting solutions to improve the client's experience. I enjoy collaborating with a variety of professional like actuaries, model developers, risk advisors, brokers and many more across the globe. Working at Guy Carpenter gives me a great sense of purpose. I get to develop innovative solutions to continue to enhance Guy Carpenter's position in this industry.

WHAT HAS SURPRISED ME THE MOST

People, sense of purpose, the culture of inclusion and diversity. Guy Carpenter is a great place to work where you can make a difference each day and have an opportunity to take calculated risks to pursue new ways of solving business problems.

#CareerTrifecta, #InsuranceCareersMonth

MY BACKGROUND

I hold a Bachelor's degree in Information Science and Technology, and a Masters degree in Technology Management. I started my career at IBM and my first assignment was with a health insurance company in New York. I developed a keen interest in understanding complex business situations and representing them as repeatable processes using technology. At Guy Carpenter, I aspire to design and build the next generation of cutting edge solutions for our clients.
