

ORSA ADVISORY SERVICES

For the P&C Insurance Industry

Managing property and casualty risk in today's business environment can be an extremely difficult task. Chief Actuaries and Chief Financial Officers are faced with the challenges of minimizing risks while maximizing returns within an ever-changing legal, economic, and regulatory environment. The challenges are only heightened with the new regulatory requirements for the Own Risk and Solvency Assessment (ORSA) that went into effect on January 1, 2015. Our independent, specialized advice and professional services are helping organizations meet this challenge.

The National Association of Insurance Commissioners (NAIC) launched the Solvency Modernization Initiative (SMI) in June 2008, seeking to upgrade regulatory supervision over the enterprise risks of US insurance companies. The NAIC subsequently adopted the ORSA Model Act in September 2012, and many states have now passed this legislation. Beginning in 2015, companies domiciled in these states with at least \$500M of written premium (or belonging to a group with at least \$1B) were required to file an ORSA Summary Report annually with the regulator.

ORSA Framework

Guy Carpenter and Oliver Wyman Actuarial Consulting have developed tailored solutions to the ORSA challenge by examining each of the four layers in ERM governance: Strategy, Process, Infrastructure, and Culture. Working with our clients, we develop solutions commensurate with the organization's scale and complexity.

Enterprise Risk Management Advisory

The Guy Carpenter & Oliver Wyman Approach

Our Professionals

We provide an assessment of current ORSA/ERM maturity against standards and best practices. We identify a timeline to prioritize closing the gaps using our proprietary 100+ point checklist.

Done in tandem or separately from the ORSA Readiness Assessment, we develop a detailed ORSA/ ERM roadmap to guide management through a structured process of embedding an effective ORSA/ERM program that meets regulatory requirements.

We assist with the development and benchmarking of qualitative and quantitative risk appetite and risk tolerance statements.

We support preparation of the ORSA Summary Report, in particular Section 2 - Insurer's Assessment of Risk Exposure and Section 3 - Group Assessment of Risk Capital and Prospective Solvency Assessment.

Risk Management-Focused Services

Compliance-Focused Services

Our broad spectrum of economic capital modeling solutions assist our clients in many ways. These solutions include existing model validation, standardized capital modeling (BenchmaRQ[®]), and customized capital modeling (BenchmaRQ[®]+). Tools available for licensing include MetaRisk[®] Reserve[™] for stochastic reserve analysis and MetaRisk[®] for full-company capital modeling.

We facilitate and assist in developing the risk management process including identification of key risks, quantification and measurement, assessment, mitigation and controls, reporting, emerging risk management, and risk learning processes.

Client Advantages

- **Partnership:** As trusted advisors, we collaborate with our clients to develop and implement practical solutions that consider our clients' unique exposures and situations.
- **Quality:** Our advice is rooted in leading-edge methodologies, thorough analysis and in-depth understanding of the drivers of risk and performance.
