

# Hi, I'm Peter

Client Support, Hoboken

## MY ROLE AT GUY CARPENTER

As a member of the Client Support Services team in the Hoboken, NJ office, I provide direct support for a wide range of complex reinsurance coverages on an international scale. My responsibilities as an XOL Claims Analyst include the daily preparation of premium and claim processing, collection and settlement of fiduciary balances, and most importantly, growing and maintaining relationships with our clients.

## WHY I CHOSE A CAREER IN (RE)INSURANCE

In an industry whose foundation is preventing loss and managing risk, I have an opportunity to apply my analytical skills to a genuine cause. The complexity of the (re)insurance landscape provides unique challenges that fuel my passion to grow both personally and professionally. This industry also offers a variety of career paths that utilize a multitude of skill sets. If you excel in reporting and investigation, the Special Investigation Unit would be a perfect fit. If you're looking for a more personable, client-facing role, producer or treaty broker could position you to succeed. The list is truly endless, and each role can prove rewarding in its own right.

## WHAT HAS SURPRISED ME THE MOST

The wealth of knowledge and experience provided to me here at Guy Carpenter has been quintessential to my growth in this industry. I was surprised by not only the level of expertise displayed throughout a diverse group of colleagues, but their understanding that there is more to learn. The company culture creates an environment that promotes personal development, as well as interpersonal connection by providing direct access to some of the leading minds in the industry. The opportunity to create your own path in such a deep-rooted profession is something few industries can provide.

## MY BACKGROUND

I graduated from St. John's University with a bachelor's in Sports Management and Business. I've held a wide variety of roles across the (re) insurance industry, including licensed insurance producer and property damage adjuster. I'm currently pursuing an MBA in Risk Management and Insurance. I aspire to use this knowledge to help spearhead the insurance industry's evolution to meet the needs of our increasingly diverse and technological landscape.
